THE PROBLEM

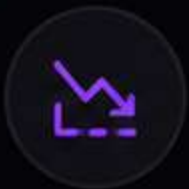

Static feedback is outdated

Traditional polls feel **slow** and **disconnected**.

Users do not get **instant visual** feedback.

Engagement drops when results are **not live**.

Most polling tools look **basic** and **uninspiring**.

Traditional Polling Experience

What's your favourite dev stack?

☐ ☐ ☐

Next.js + Prisma 30%

Vue + Django 25%

PollSphere

THE SOLUTION

PollSphere makes feedback feel **alive**

PollSphere transforms polling into a **live experience**. Every vote updates instantly using WebSockets, analytics change in real time, and the premium interface keeps users engaged.

Real-time Updates

Every vote is instantly broadcasted using WebSockets.

Live Analytics

Watch results and audience momentum change in real time.

Modern UI

Premium dark-mode interface with smooth animations.

Interactive Experience

Engaging, fast, and built for creators, teams, events and communities.

LIVE POLL

HOW IT WORKS

Simple, fast, and **interactive**

Create, share, and watch your polls come to life in real time. PollSphere makes engagement effortless.

Fast & Effortless

Create polls in seconds and share instantly.

Accessible Anywhere

Users can vote from any device, anytime.

Live Synchronization

Every vote updates instantly for everyone.

Actionable Insights

Track engagement and audience momentum in real time.

1

Create a Poll

Build your poll in just a few clicks.

2

Share Instantly

Get a shareable link and send it anywhere.

3

Users Vote Live

Users cast their votes from any device.

4

Results Update

Results update in real time for all.

5

Track Momentum

Analyze live analytics and audience trends.

KEY FEATURES

Everything You Need in One Platform

PollSphere combines real-time technology with premium analytics and security-focused features. From Vote Flux visualization to anti-spam protection, every feature is built for modern engagement.

Real-time Voting

Votes are cast and counted instantly using WebSockets.

Live Analytics

Watch results update in real time with powerful insights.

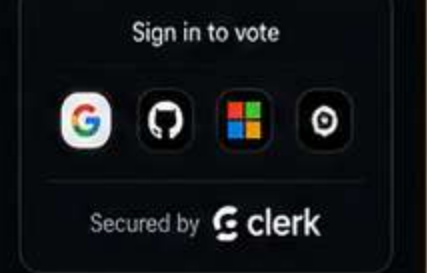

Vote Flux Visualization

Visualize audience momentum with our signature Vote Flux chart.

Auth-Protected Polls

Restrict voting to signed-in users with Clerk authentication.

Anti-Spam Protection

IP-based rate limiting and smart detection keep polls secure.

Poll Expiry System

Set expiry time and polls auto-close when done.

Instant Share Links

Share your poll instantly via link, QR code, or social platforms.

Dark / Light Mode

Switch themes anytime for your perfect experience.

PollSphere is packed with everything you need to **engage**, **analyze**, and **grow** your audience.

PollSphere

TECHNOLOGY STACK

Built with Modern Web Technologies

We built PollSphere using a modern full-stack architecture optimized for performance, scalability, and developer experience.

Type-Safe Development

End-to-end TypeScript for safer code, fewer bugs, and better developer productivity.

Frontend React 19 + Vite

Lightning-fast development with the latest React and blazing-fast Vite build tool.

Backend Node.js + Express (TypeScript)

Scalable and powerful server built with Node.js, Express, and TypeScript.

Real-time Engine Socket.IO

Bi-directional, low-latency communication for truly real-time poll updates.

Database MongoDB + Mongoose

Flexible and scalable NoSQL database with powerful aggregation pipelines.

Authentication Clerk

Secure authentication, user management, and enterprise-grade security.

Validation Zod

Schema validation for APIs and inputs to ensure data integrity and reliability.

High Performance

Optimized for speed and low latency.

Scalable Architecture

Built to handle thousands of concurrent users.

Secure by Design

Security-first approach at every layer.

Developer Friendly

Modern stack, clean code, and great DX.

PollSphere

USE CASES

Perfect for Live Engagement

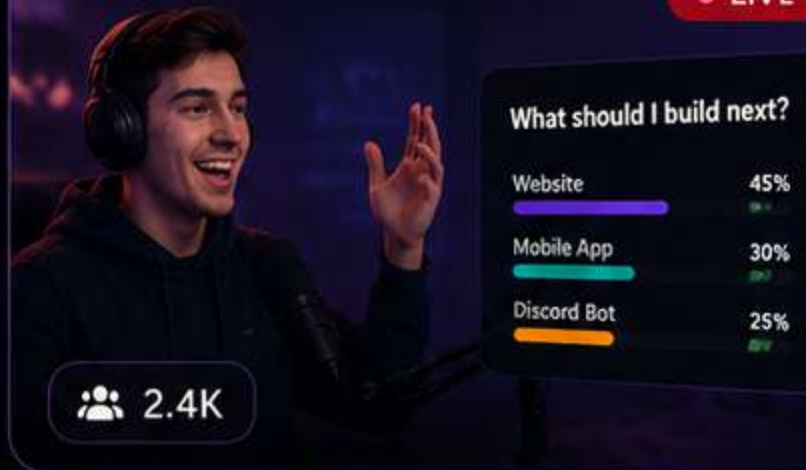

PollSphere is flexible and can power engagement across creators, education, events, startups, and online communities.

Content Creators & Streamers

Engage your live audience with instant polls and see results update in real time.

LIVE

Events & Webinars

Run interactive sessions and get live feedback from thousands of participants.

Teachers & Classrooms

Check understanding, spark discussions, and make learning interactive.

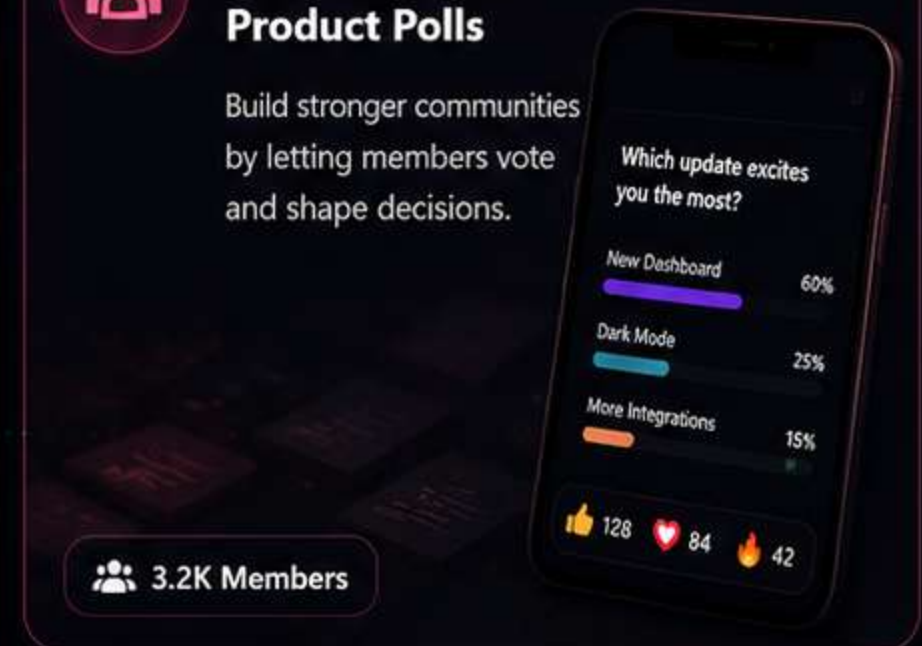

Startups & Teams

Gather feedback, validate ideas, and make data-driven decisions as a team.

Communities & Product Polls

Build stronger communities by letting members vote and shape decisions.

Any audience. Any place. Any device. **Real-time engagement** that makes an impact.

PollSphere

WHY POLLSPHERE STANDS OUT

More Than a Poll Tool

PollSphere redefines audience engagement with real-time interaction, powerful analytics, and a modern experience built for the future.

PollSphere doesn't just collect votes, it **captures momentum**.

OUR UNIQUE EDGE

Vote Flux™

Most tools show final results.
PollSphere shows the journey.

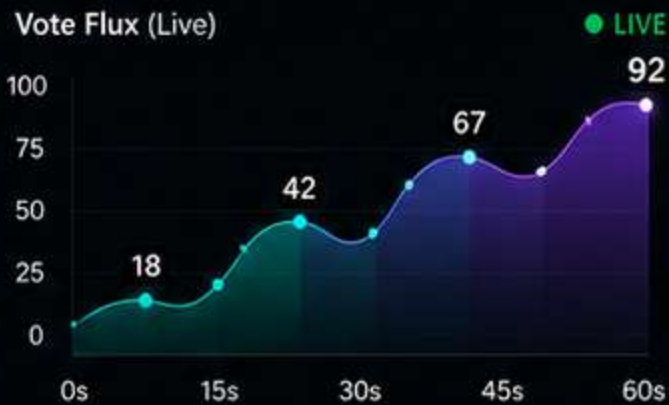

Visualizes real-time momentum as votes come in.

Shows engagement waves, not just static numbers.

Helps you react in the moment and drive better engagement.

FEATURE

POLLSPHERE

OTHER TOOLS

Real-time Voting

Delayed / Manual refresh

Vote Flux Visualization

✓ Yes, visual momentum

No, static results only

Live Analytics Dashboard

✓ Instant insights

Basic & delayed insights

Premium Design & UX

✓ Modern, stunning UI/UX

Outdated, basic interfaces

Real-time Infrastructure

✓ Socket.IO powered architecture

Limited or non real-time

Scalability

✓ Built to scale seamlessly

Not designed for scale

Security First

✓ Auth, rate limit, anti-spam, secure

Basic or limited security

Unique "Vote Flux" Concept

We visualize audience momentum in real time, so you see the story behind every vote.

Premium Design

A beautiful, intuitive interface that keeps your audience engaged and coming back.

Real-time Infrastructure

Powered by WebSockets and Socket.IO for lightning-fast updates across all devices.

Built for Scalability

From small communities to millions of users — PollSphere grows with you.

Security-First Architecture

Authentication, rate limiting, anti-spam, and secure data handling at every layer.

PollSphere delivers a **real-time, secure, and unforgettable** polling experience like no other.

PollSphere

FUTURE ROADMAP

Building the Future of Live Feedback

We're pushing the boundaries of real-time engagement with smarter tech, deeper insights, and global scale.

Our Vision

Smarter feedback.
Stronger connections.
Limitless possibilities.

AI-Powered Sentiment Analysis

Understand audience emotions in real time with advanced AI models for deeper insights.

Sentiment Overview

White-Label SDK Platform

Embed PollSphere anywhere with our powerful SDK. Build custom experiences with full control.

```
// PollSphere SDK
import { PollSphere }
from 'pollsphere-sdk';

const poll = new
PollSphere({
  apiKey: 'your_api_key'
});

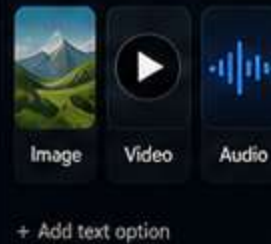

poll.create(...);
```

Multimodal Polling

Go beyond text. Create polls with images, videos, audio, and more for richer interactions.

Which ad do you prefer?

Mobile Expansion

Native mobile apps for iOS and Android to make live polling accessible — anytime, anywhere.

Scalable Infrastructure

Built on distributed architecture to handle millions of users with ultra-low latency and high availability.

WHAT'S COMING NEXT

Predictive Analytics

AI-driven predictions to forecast trends and engagement.

Advanced Security

Enterprise-grade security, SSO, and compliance support.

Team Collaboration

Real-time collaboration tools for teams and organizations.

Global Reach

Multi-region support to bring PollSphere closer to everyone.

More Integrations

Seamless integrations with tools you use every day.

And Much More

New features, experiments, and innovations ahead!

The future is interactive.
The future is PollSphere.

Our mission is to make **every voice** heard, **every insight** meaningful, and **every experience** unforgettable.

PollSphere

Turn votes into
live energy.

Thank you
